

Internet Websites to Supplement Student Learning

These websites may be used at the discretion of parents to supplement student learning at home when attendance at school is not possible. They cover a range of topics and ability levels and should be previewed before provided to students.

Parents should also consider the amount of time their children access iPads/tablets, and computing devices. The following recommendations have been provided by the Health Department of WA:

Children 2-5 years - no more than 60 minutes per day of screen time.

Children 5 – 12 years no more than 2 hours per day of screen time.
