Department of Education Strategic Directions

OFFICIAL

We can only achieve this if we understand that we are preparing our students for the world of tomorrow – not the world of today.

The Department of Education's [2020-2024 ICT Vision for Teaching and Learning in Public Schools](#), focuses on the importance of 'preparing students for a world that is constantly changing and evolving, by developing in them the personal capabilities and technical skills they will need for success.' – *Lisa Rodgers, Director General*.

Students

Must have the capability to adapt and transfer their knowledge and skills across a range of learning and work environments.

Teachers

Need to model collaboration and acquisition of new skills through continuous learning. Teachers also need to embrace technology and be flexible in the way they teach to inspire and maximise learning.

School Leaders

Take responsibility for driving a culture of technological innovation and collaboration, ensuring students have access to technologies that deliver improved learning outcomes and progress for *every student, every classroom, every day*.

Overview of the BYO iPad 1:1 Program

The BYO (Bring Your Own) iPad Program refers to each student in the classroom having their own personal device that they use at school and home. Having a 1:1 ratio allows every student to seamlessly transition between activities involving technology and traditional learning throughout the school day. Utilising technology in the classroom provides students with limitless possibilities to participate with content and demonstrate their knowledge in engaging and interactive ways.

Our reason for integrating a BYO iPad 1:1 Program in Years 3-6 is to effectively implement the requirements of the [WA ICT General Capabilities](#) and [WA Digital Technology Curriculum](#), and to prepare students with the skills they require for high school and the modern day workforce.

Students in Years 3-6 are required to bring an **Apple iPad** to use as a tool to enhance and assist their learning.

? Why Apple iPads?

Aspiri Primary School has engaged in a significant amount of research and explored a number of possibilities when deciding upon the most appropriate technology to support students to meet the curriculum requirements. Apple iPads have been selected due to the following benefits:

- Cost efficient
- Lightweight and portable (small in size)
- Versatile range of learning applications
- Reliable and stable
- User friendly and age adaptable
- Accessibility features and enhanced security
- Provides opportunities for creativity and collaboration

Considerations:

- The newer the iPad, the longer it will be able to accommodate future software and app purchases
- Airplay and Airdrop functions are supported with the latest model iPads
- Available technology on new versions of the iPad are of greater capacity and quality than previous devices. An iPad compatible with the latest operating system (iOS) enables access to features such as Files, including the ability to save to file servers or external drives, easier text editing, slide over and split views for easier multitasking between applications
- Styluses such as Apple pencils and Logitech crayons are compatible with Apple iPads

Hardware

In order to work efficiently and ensure compatibility with the school system and classroom needs, devices must have the following features:

- be an **Apple iPad A16**
- have iPadOS 26.1 installed
- data storage of **at least 128gb**

Please note: alternative devices, including Android tablets, iPad minis, iPad Pros and iPads with a sim card (which use mobile cellular 3G/4G/5G data) will not be permitted.

iPad Specifications

Accessories**Required:**

- Protective case/cover
- Headphones- wireless recommended
- Bluetooth keyboard (either inbuilt with case or separate)

Optional:

- Screen protector
- AppleCare+
- Stylus- generic, Apple Pencil or Logitech Crayon

Purchasing Options

Aspiri Primary School has partnered with JB HiFi to provide iPads at a discounted price to the parent community with the following benefits:

- discounted education pricing on all requirements (i.e. iPad, keyboard, cover etc)
- optional two years of insurance
- collection available from nearest JB HiFi store

Some parents may wish to purchase devices as a Christmas present for their child before their child transitions to the new year level in 2026. Families wishing to take up this option may place an order online with JB HiFi:

[Education - JB Hi-Fi Education](#)

School code is **Aspiri2026**

Parents may opt to purchase an iPad elsewhere, however in doing so, we recommend careful consideration is given to the requirements, warranties and insurances when buying from other stores. Privately purchased devices will not necessarily have the same technical support provided to students whose device has been procured through the school's partnered provider.

AppleCare+

All Apple hardware comes with a one-year limited warranty and up to 90 days of complimentary telephone technical support. You can extend your coverage through AppleCare+ with a small additional cost, which provides a two year warranty extension. See link below for more information: <https://www.apple.com/au/support/products/ipad/>

Insurance

Insurance is an important consideration as the iPad your child brings to school is not covered by the Aspiri Primary School or the Department of Education's insurance. It is the responsibility of parents to insure their child's device.

Application requirements

A variety of applications have been carefully selected for each year group to support learning and help students use their iPads effectively in class. The list includes a small selection of carefully chosen apps to enhance learning and creativity. Some come preinstalled, others are free to download and a few are paid. The application list can be found on page 9.

Years 3–5 (Managed iPads)

Students in Years 3–5 will have their iPads included in the school's management system. This means, all required applications will be automatically installed on their device by the school. Parents and carers do not need to download or purchase these apps.

Year 6 (Unmanaged iPads)

Before the start of the school year, all students in Year 6 must have the required applications. Parents and carers will need to download all required applications onto their child's iPad.

Please note that while the applications listed on the **2026 Core Applications List** are current, additional apps may be introduced throughout the year as part of classroom learning.

2025-2026 Application list

Years 3-4 BYOD 1:1 Student iPad Applications List 2026

These applications are managed through our school management system and will be pushed out to student iPads at the commencement of the school year.

Total Cost of Apps = \$28.48

A reminder that if you use Apple's Family Sharing feature you will only ever have to purchase one copy of each app for your entire family. Check the apple website for further details: <https://support.apple.com/en-au/HT201088>

Device setup and Responsibilities

Device Setup- Unmanaged

Setting up a child's Apple ID account under [Family Sharing](#) allows parents to implement safety measures such as [Parental Controls](#) and [Screen Time](#) to block notifications and home applications from being accessed and used during school time. They may have personal apps installed on their devices, but these are **not to be used at school/during school hours**. This includes sending and responding to messages. Apple Classroom has been set up in all classrooms to assist staff in monitoring this.

Device Setup- Managed

Whilst at school, the use of student iPads will fall under the school management system JAMF. At the beginning of the school year, new devices to the program will be collected by the school and the Jamf supervision profile will be added to the device. This allows school-based applications to be installed automatically. As part of this process, devices are restored to factory settings, therefore we strongly recommend that any important data is backed up. Please note, **you cannot restore a backup after JAMF has been added**.

If you are bringing an existing household device to school, it will need to be restored to factory settings before the start of Term 1, 2026.

Battery (Charging)

The student is responsible for ensuring they charge their iPad battery each night as they will not be able to charge devices at school. Students need to have at least 80% charge before arriving each morning.

Student Responsibilities

- iPads are to be in their case when they are being carried around the school grounds.
- On arrival or leaving school grounds, iPads are to be kept in the student's bag.
- iPads will be used by students for learning and teaching outcomes only.
- Parents are not to be contacted through their device e.g emails or messaging.
- Students will not share or lend their iPad with other learners.

School Responsibilities

- Ensure all staff are trained in using common applications and platforms.
- Provide Cyber Safety resources for parents and students.
- Integrate ICT into the curriculum to maximise learning opportunities for students.
- Deliver the Digital Technologies curriculum to all students.
- A secure place will be provided for the storage of iPads when not in use.

Technologies Usage Agreements

Parents and students must agree to the terms of the Internet Usage Agreement: Online Services before online student accounts are accessed.

As per Department of Education policy, students will not be allowed to use personal or school iPads until consent forms for [Third Party Service Providers](#) are returned to the school.

Once these forms are completed, we strongly encourage you to sit down with your child and go through the [BYO iPad 1:1 Program Years 3-6 Student Agreement](#) so they understand the expectations of using technology and devices appropriately, as well as the consequences for misuse. This form must be read and signed by both parties (parent and student) and returned to school **before** students can bring and/or use a personal or school device in class.

The Apple iPad must not be used for any activity that is not directly and explicitly endorsed by the school and its staff.

1. Internet Usage Agreement: Online Services- Enrolment form
2. Years 3-6 Third Party Services Consent Form
3. BYO iPad 1:1 Program (Years 3-6 Student Agreement)

Ongoing Care and Maintenance

Storage and Backup

It is important to organise the iPad regularly to allow for updates and new work. In order to free up space, any photos or documents that are unused and no longer needed, should be cleared or backed up. For those who wish to keep certain photos, videos, documents etc, here are a few options:

1. Backing up to iCloud on the iPad
<https://support.apple.com/en-au/HT203977>

Limit for free storage is 5gb. The iPad will not function well if the storage space on the hard disk or cloud becomes full.

2. Student cloud storage using OneDrive (up to 1TB). This can be through the Microsoft app or online <https://www.microsoft.com/en-au/microsoft-365/onedrive/online-cloud-storage>

Students will need to log in using their Education Department log in credentials.

3. Using a Home PC/Desktop or external hard drive to back up data.

Cleaning

You can maintain the iPad screens and covers by cleaning on a Termly basis. Read the following link to get more information: <http://www.wikihow.com/Clean-Your-iPad>

iPad Care

+

=

No Way!

Take care of your iPad.

- Avoid placing weight on the iPad.**
- Never throw or slide an iPad.**
- Never expose an iPad to long-term temperature extremes or direct sunlight.**

Promoting a Safe Learning Environment

OFFICIAL

As per the WA Department of Education guidelines, Internet and Online Services provided to students will primarily be used for learning related activities and require informed parental consent, user agreements and appropriate management. Online services are provided to students in public schools for learning related activities and the Department strives to protect students from exposure to inappropriate online material and activities.

Students engage in learning about ethical and safe use through online platforms. Lessons are consciously planned and implemented to enhance development of ICT skills and Digital Technologies understanding, in order to prepare them for an ever changing social, higher-education ever changing social, higher-education environment and future workforce.

We encourage students and teachers to safely and ethically access the internet and email, use organisational tools and engage with resources to innovate and transform their teaching and learning.

Our staff work hard to ensure that your child/ren are safe and that the environment that they work in is also safe. This also applies to use of iPads.

We take the following steps to ensure your student and their property is safe:

- Each student must read and sign the BYO iPad 1:1 Agreement and understand the Acceptable Internet Usage policies
- iPads are kept inside the classroom (not in bags)
- Students are not to use iPads before or after school in school grounds
- Classrooms are locked when the class is outside
- iPads are not to be used outside of the classroom without explicit teacher permission
- The school internet connection is provided by the Department of Education and passes through all of the filters for Public Schools
- Teachers address Cyber Safety through the Digital Technologies and Health curriculum- discussing issues on sharing personal information online, other online dangers, cyber bullying and the students' digital footprints

Privacy

Staff, parents/carers and the community need to encourage students to be aware of the risks associated with some online activities and how to adopt protective online behaviours to protect them from exposure to inappropriate online material or activities. Some suggestions are:

- Keep personal details private by using a nickname instead of a real name and always ask parents before giving out private information online (such as name, address or phone number)
- Keep usernames and passwords private
- When responding to others online, posts should be positive and constructive. Once posted, a message can be difficult to remove
- Always ask for permission/consent before taking and posting photos of others online
- Respect others' rights when consent is not given

Online Safety

Cyber Safety

Cyber safe practices are a high priority at Aspiri Primary School and appropriate duty of care is extended to all our digital environments. Students and parents also have a responsibility in this area to minimise risk or exposure to unsuitable material.

Students are prohibited from accessing or storing offensive images, video or audio on any ICT device used at school. This includes content that is offensive to other cultures, religions and learning abilities.

Any misuse of digital technology or online tools will result in students being subject to consequences as listed in the school's [ICT Use policy](#) and [Behaviour Management policy](#).

Social Media

Most social media sites will only let users open an account under the prerequisite age requirement of 13 years and older. This is primarily for safety reasons, as young children do not understand the dangers of cyber predators, and because younger children have not yet developed the good judgement to know what is okay to post and what is not. They are also exposed to adult content via social networks and applications which can be suggestive or inappropriate. Cyberbullying is emerging as a pretty devastating and destructive outcome for young children as well.

With all of the above in mind, we have made a decision to ban all social network/social media/chat room-type applications from devices, with the implementation of Jamf management and Apple Classroom in 2026. We understand that some parents have used their parental discretion to allow their child to participate in social media at home, however at APS this will not be permitted.

Please understand that these measures are in place to protect the students at Aspiri PS. If your child is in the Years 3-6 Bring Your Own iPad Program, please ensure that these applications are deleted from your child's device that they bring to school.

If found on devices at school, we will exercise our right and obligation to report prohibited accounts.

If you have concerns regarding your child's online safety, please access the Office of the Children's eSafety Commissioner at <https://www.esafety.gov.au/>

Office of the eSafety Commissioner

Is there an age limit for kids on social media?

13 Most social media services and apps require users to be 13 years old to join.

WHAT ABOUT APPS? App stores set their own age ratings based on the app's content.

WHY 13? This is usually to comply with the Children's Online Privacy Protection Act of 1998 (COPPA)—a US law preventing the collection and storage of personal information from a child under 13.

Age Guide to Social Media

- SOCIAL MEDIA
- TERMS OF USE - MINIMUM AGE REQUIREMENTS
- APP STORE RATING
- GOOGLE PLAY RATING

Family Sharing & Child Apple ID

We request parents set up and manage their child's Apple ID account so they can monitor student use of technology. One parent/carer can be nominated as the 'Family Organiser' to set up a Child's Apple ID for students under the age of 13.

****Conditions: The Family Organiser must have an Apple device. Through Family Sharing, an additional 5 family members can be linked.****

- Family members can use the applications without having to purchase new licences
- Family Organiser can retrieve forgotten passwords
- Before purchasing applications, children have to ask for permission (part of the 'Ask to Buy' function) from the Family Organiser
- The same music, movies, TV shows, books and applications can be accessed through File Sharing
- Family Organisers have the ability to limit their child's access on their device using Screen Time

For a step-by-step guide to setting up a Family Sharing & Child's Apple ID, visit:

<https://www.apple.com/family-sharing/>

<https://support.apple.com/en-au/HT201084>

Parental Controls

Content and Privacy restrictions offered through Screen Time can act to block out or limit specific apps and features on your child's device. You can:

- Set a Parent Passcode and Screen Time password to prevent other family members from changing settings
- * *Ensure the parent access passcode is different to the one used to unlock the device**
- iTunes and App Store purchases can be prevented
- Built in apps and features can be turned off
- Explicit content can be blocked from playing in music, films, TV shows with specific ratings, apps (ie. FaceTime) and web content, Siri searches and Game Centre functions.

To learn more about setting Content and Privacy Restrictions, visit: <https://support.apple.com/en-us/HT201304>

Screen Time

Screen Time allows you to see how much time you and your children spend on apps, websites and more. In turn, this can help you to:

- Make informed choices about how you use your devices
- Set a Screen Time Passcode (different to passcode used to unlock device) to change Screen Time settings or provide additional time when application limits expire
- Get a detailed report about how the device is used, including applications which have been opened and websites visited
- Set Downtime or a set length of time to turn off specific applications (ie before bed)
- Set Application limits for categories of apps, including time limits and days of the week when these apply
- Set limits for communicating via Phone, Facetime and Messages

Device Use at Home

Aspiri Primary School strongly encourages active supervision of your child's use of technology at home. The internet is an excellent learning tool and enables access to information that supports all areas of our curriculum.

We suggest the following guidelines be followed when your child is using their iPad at home:

- Supervise your child in a public room like the family room
- Avoid your child accessing ICT in bedrooms or rooms that can be closed off to other members of the family
- Ensure that you establish some expectations regarding internet use at home and that you have the right to your child's passwords for any apps or websites that they may be using
- Check Internet browser's "History" menu to allow you to see the sites your child has visited recently

- Ensure your child never provides personal information on a global system or identifies friends or themselves in photos available to the public
- Educate yourself and your children about potential dangers online and how to make the right choices about online behaviour. Use readily available websites like www.cybersmart.gov.au to assist you
- Regularly monitor children's use of social media and their legal requirements - for example: children must be over the age of 13 to be eligible for Facebook and Instagram accounts

Please note that students will be using the device for approximately 2 -3 hours whilst at school.

This needs to be kept in mind when parents are determining how much time to allow the students to use the device at home.

This User Agreement is to ensure students using iPads enhance their learning in a safe, secure environment. It is also to help keep each device secure, working properly and used in a productive and appropriate manner. As the minimum age for opening most social media accounts is 13+, social networking websites and apps are not permitted on devices used in the BYO iPad 1:1 Program at Aspiri Primary School. If your child is found to have a social media account or app, we must exercise duty of care and have legal obligation to report prohibited accounts. Therefore, we ask that you ensure such applications are deleted from your child's device.

Responsibilities of Students:

General – Personal iPad

I will be responsible for my iPad and make sure it is used safely and securely.

This means I will:

- use a passcode on my iPad and I will not give this passcode to other students.
- be the only one allowed to use my iPad at school (even if working in a pair or group) and will not allow anyone else to use or borrow my iPad at school.
- immediately close the cover and give the iPad to my teacher if an inappropriate site, image or message is being displayed.
- carry my iPad carefully and ensure it is in its protective case.
- ensure my iPad is clean and fully charged *every day*.
- keep my iPad in my bag before and after school and not take it out during break times (unless enrolled in an extracurricular/lunchtime club)
- use my iPad only for my learning as instructed, when instructed by the teacher (only use apps and programs the teacher has instructed me to use)
- use the iPad at school to help my learning and not for entertainment while at school
- keep food and drinks away from my iPad.
- immediately report any damage or problems I notice to the teacher.

I agree to:

- allow my parents or teachers to monitor my iPad usage and check at any time. This includes how it is being used, the photos, other content, books and installed applications.
- close all the apps on my iPad before I get to class in the morning.

We have a very limited number of devices available for students in Years 3-6 to borrow at school, as it is the expectation that all students come to school with their own iPad. These are only available in extenuating circumstances (such as being new to the school or for students with a personal device in for repair) and will not be provided for students simply because they forgot to charge their iPad or left it at home.

General – BYO Borrow School iPad

I will be responsible for the iPad and make sure it is used safely and securely.

This means I will:

- only use the iPad assigned to me (same numbered iPad where possible).
- ensure my hands are clean before using the iPad.
- not remove the iPad cover.
- keep food and drinks away from the iPad.
- not touch or change any settings, displays, options or updates on the iPad.
- use the iPad only for my learning as instructed, when instructed by the teacher (only use apps and programs the teacher has instructed me to use)
- immediately report any damage or problems I notice to the teacher.
- keep the borrowed iPad in the locked classroom during break times (unless enrolled in an extracurricular/lunchtime club)
- return the iPad to the storeroom at the end of the day and plug it in to charge

I agree to:

- allow my teachers to monitor my iPad usage and check at any time. This includes how it is being used, the photos, other content, books and installed applications.
- close all the apps on the iPad and log out of all accounts at the end of the day and check all accounts are logged off at the beginning of the day

Digital Citizenship:

I will:

- be cybersmart when using the internet.
- always use the iPad appropriately.
- not use messaging or social media websites or applications.
- not bully anyone online and will tell the teacher if I see this happening.
- only take photos and videos of other students/teachers with their permission and for an educational purpose
- only use my own work on the iPad.
- follow any other rules for using the iPads that my teachers and parents may set.

Student Agreement:

I understand and will follow the BYO iPad 1:1 Student Agreement for Years 3-6 students of Aspiri Primary School. I will also follow any additional class teacher and parent rules.

I understand that using a device at school is a privilege, not a right. If I am found to be breaking any of the rules in the agreement through inappropriate use of a device or online account, it may result in disciplinary action, determined by the teacher/principal in accordance with the Department's [Students Online in Public Schools Policy](#) and [Student Behaviour in Public Schools Policy and Procedures](#).
